

THERE ONCE WAS A MAN WHO LOVED ROSES

his name was DAVID AUSTIN, and he loved them so much, that he started to breed hundreds of them.

the most precious one is said to cost him almost ten years and several million pounds. our bar is dedicated to his masterpiece, the SWEET JULIET rose, a homage to its famous namesake from *romeo & juliet*.

our cocktails are divided into various categories, each curated and cherished by one of our team members. most of the following cocktails have been created or adapted by our team.

just as david did with his roses, we strive to offer something special to each of our guests - whether it's through the sophistication of a cocktail, the richness of a good wine, or the finesse of selected spirits.

SUSTAINABILITY AND ZERO WASTE #FROMROOTTOFRUIT

another significant focus here at JULIET ROSE revolves around sustainability and waste reduction. we are dedicated to integrating eco-friendly alternatives wherever feasible.

for example, our menu is printed on grass paper, which consumes up to 90% less water in its production compared to conventional paper, and our straws are made from german reed, a rapidly renewable environmental resource.

this commitment extends to our culinary practices as well. our motto, #fromroottofruit, inspired by FERGUS HENDERSON's nose-to-tail concept, underscores our dedication to minimizing waste and maximizing the use of ingredients. we strive to utilize every part of the fruit and herb, repurposing fruit scraps, for instance, in the production of our homemade cordials.

last but not least, we have carefully selected a range of spirits for our bar that prioritize sustainability themselves, such as DISCARDED, FLOR DE CAÑA, or FAIR.

ecoSPIRITS

additionally, we are proud to collaborate with ecoSPIRITS to further our commitment to sustainability.

for some of our cocktails, we utilize the ecoSPIRITS system, which not only contributes to an average saving of 150g of CO_2 with each cocktail served but also actively supports tree cultivation, planting, and protection by local village cooperatives in thailand and indonesia through their partnership with the green steps group.

in our personal JULIET ROSE forest, each tree will sequester an impressive 2,300 kg of CO_2 over its 100-year lifespan. this innovative system aligns perfectly with our ethos of environmental stewardship and allows us to make a tangible impact on carbon reduction and reforestation efforts.

SELVA NEGRA
A GERMAN AGAVE TEMPTATION

crafted by seasoned industry experts with a passion for tequila and mezcal, SELVA NEGRA is a tribute to the unexpected. their secret lies in the elusive mexican wild agave *salmiana*, sourced straight from mexico, renowned for its floral notes and subtle pepperiness.

guided by the skillful hand of distiller florian faude, they ferment *salmiana* extract with a special wine yeast and double-distill it to perfection. between distillation steps, they infuse the essence of black forest spruce, adding a touch of local magic.

and as for that smoke? while mezcal may claim it as its signature, they've put their own twist on things. utilizing local woods, they impart a delicate smokiness that's sure to please every palate.
